

## **Suggestions for Interviews**

- If possible, get introduced by a local.
- Understand that the storyteller has an interior voice that:
  - communicates the individual vision of what he has lived through
  - the ethics that guided him and
  - the intentional choices that are the foundations of his life.
- A woman interviewing seems to be easier to accept, because she is perceived as a social being
- It is indispensable to accept and understand the dialect in the locality
