

Preparing a Journalistic Interview

Using a mobile recording unit

Are you familiar with the unit and the microphone, do you know how to connect them and what buttons to push?

- Check (out):
 - recording level
 - batteries (also for micro!)
 - empty cassette / MD (labelled)
 - earphones

Interviews in the studio

- Arrange the setting so that your guest's voice is picked up as well as possible by the microphone.
- Set up headphones for yourself and your guest (with individual volume controls, if possible).
- If you will be working 'live' or pre-producing in 'real time': agree with the guest (technician) on hand signals to be used during the interview.
