INVITED Talks is a series of events focused on **Virtual Exchange (VE) in pre-primary and primary language classrooms**, organized by INVITED project (invited-project.eu).

Joanna Mach is an experienced English teacher and IT educator from Poland. Over the past 15 years, Ms. Mach has implemented dozens of innovative eTwinning projects with pupils aged 3 to 15 - projects that have earned numerous National and European Quality Labels, top national competition awards, and even international recognition.

About the event:

The webinar will focus on how eTwinning projects can effectively support students with diverse special educational needs. I will present practical project ideas, inclusive pedagogical strategies, and digital tools that promote collaboration, creativity, and differentiated learning. Using the award-winning national competition project “A Rainbow of Emotions” as a guiding example, she will lead participants through a range of inventive activities designed to inspire and empower teachers in meeting the unique needs of primary school learners.
